**Revision Date:** 16.10.2020  
**SDS Number:** 24928-00017  
**Date of last issue:** 23.03.2020  
**Date of first issue:** 23.10.2014

---

**Most important symptoms and effects, both acute and delayed:**  
Contact with dust can cause mechanical irritation or drying of the skin. Dust contact with the eyes can lead to mechanical irritation.

**Protection of first-aiders:**  
No special precautions are necessary for first aid responders.

**Notes to physician:**  
Treat symptomatically and supportively.

---

**SECTION 5. FIRE-FIGHTING MEASURES**

**Suitable extinguishing media:**  
- Water spray  
- Alcohol-resistant foam  
- Carbon dioxide (CO2)  
- Dry chemical

**Unsuitable extinguishing media:**  
None known.

**Specific hazards during firefighting:**  
Avoid generating dust; fine dust dispersed in air in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard. Exposure to combustion products may be a hazard to health.

**Hazardous combustion products:**  
Carbon oxides

**Specific extinguishing methods:**  
- Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.  
- Use water spray to cool unopened containers.  
- Remove undamaged containers from fire area if it is safe to do so.  
- Evacuate area.

**Special protective equipment for fire-fighters:**  
- Wear self-contained breathing apparatus for firefighting if necessary.  
- Use personal protective equipment.

---

**SECTION 6. ACCIDENTAL RELEASE MEASURES**

**Personal precautions, protective equipment and emergency procedures:**  
Follow safe handling advice (see section 7) and personal protective equipment recommendations (see section 8).

**Environmental precautions:**  
- Avoid release to the environment.  
- Prevent further leakage or spillage if safe to do so.  
- Retain and dispose of contaminated wash water.  
- Local authorities should be advised if significant spills cannot be contained.

**Methods and materials for containment and cleaning up:**  
- Sweep up or vacuum up spillage and collect in suitable container for disposal.  
- Avoid dispersal of dust in the air (i.e., clearing dust surfaces with compressed air).  
- Dust deposits should not be allowed to accumulate on surfaces, as these may form an explosive mixture if they are released into the atmosphere in sufficient concentration.  
- Local or national regulations may apply to releases and disposal of this material, as well as those materials and items employed in the cleanup of releases. You will need to determine which regulations are applicable.
SECTIONS 13 and 15 of this SDS provide information regarding certain local or national requirements.

SECTION 7. HANDLING AND STORAGE

Technical measures: Static electricity may accumulate and ignite suspended dust causing an explosion. Provide adequate precautions, such as electrical grounding and bonding, or inert atmospheres.

Local/Total ventilation: Use only with adequate ventilation.

Advice on safe handling: Do not breathe dust. Handle in accordance with good industrial hygiene and safety practice, based on the results of the workplace exposure assessment. Minimize dust generation and accumulation. Keep container closed when not in use. Keep away from heat and sources of ignition. Take precautionary measures against static discharges. Take care to prevent spills, waste and minimize release to the environment.

Hygiene measures: If exposure to chemical is likely during typical use, provide eye flushing systems and safety showers close to the working place. When using do not eat, drink or smoke. Wash contaminated clothing before re-use.

Conditions for safe storage: Keep in properly labeled containers. Store in accordance with the particular national regulations.

Materials to avoid: Do not store with the following product types: Strong oxidizing agents

Engineering measures: Ensure adequate ventilation, especially in confined areas. Minimize workplace exposure concentrations. Apply measures to prevent dust explosions. Ensure that dust-handling systems (such as exhaust ducts, dust collectors, vessels, and processing equipment) are designed in a manner to prevent the escape of dust into the work area (i.e., there is no leakage from the equipment).
Personal protective equipment

Respiratory protection: If adequate local exhaust ventilation is not available or exposure assessment demonstrates exposures outside the recommended guidelines, use respiratory protection.
  
  Filter type: Particulates type
  
  Hand protection

Material: Chemical-resistant gloves

Remarks: For prolonged or repeated contact use protective gloves. Wash hands before breaks and at the end of workday.

Eye protection: Wear the following personal protective equipment:
  Safety goggles

Skin and body protection: Skin should be washed after contact.
