4.1 Description of first aid measures

General advice : In the case of accident or if you feel unwell, seek medical advice immediately. When symptoms persist or in all cases of doubt seek medical advice.

Protection of first-aiders : First Aid responders should pay attention to self-protection, and use the recommended personal protective equipment when the potential for exposure exists (see section 8).

If inhaled : If inhaled, remove to fresh air. Get medical attention.

In case of skin contact : In case of contact, immediately flush skin with soap and plenty of water. Remove contaminated clothing and shoes. Get medical attention. Wash clothing before reuse. Thoroughly clean shoes before reuse.

In case of eye contact : In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. If easy to do, remove contact lens, if worn. Get medical attention.

If swallowed : If swallowed, DO NOT induce vomiting. Get medical attention. Rinse mouth thoroughly with water.

6.3 Methods and material for containment and cleaning up
Methods for cleaning up: Soak up with inert absorbent material.
   For large spills, provide dyking or other appropriate contain-
   ment to keep material from spreading. If dyked material can
   be pumped, store recovered material in appropriate container.
   Clean up remaining materials from spill with suitable absor-
   bent.
   Local or national regulations may apply to releases and dis-
   posal of this material, as well as those materials and items
   employed in the cleanup of releases. You will need to deter-
   mine which regulations are applicable.

   practice, based on the results of the workplace exposure as-
   ssessment
   Keep container tightly closed.
   Do not eat, drink or smoke when using this product.
   Take care to prevent spills, waste and minimize release to the
   environment.
Hygiene measures: If exposure to chemical is likely during typical use, provide eye
   flushing systems and safety showers close to the working
   place. When using do not eat, drink or smoke. Wash contami-
   nated clothing before re-use.
   The effective operation of a facility should include review of
   engineering controls, proper personal protective equipment,
   appropriate degowning and decontamination procedures,
   industrial hygiene monitoring, medical surveillance and the
   use of administrative controls.

7.2 Conditions for safe storage, including any incompatibilities
Requirements for storage areas and containers: Keep in properly labelled containers. Store locked up. Keep
tightly closed. Store in accordance with the particular national
   regulations.
