General advice: In the case of accident or if you feel unwell, seek medical advice immediately. When symptoms persist or in all cases of doubt seek medical advice.

If inhaled: If inhaled, remove to fresh air. Get medical attention.

In case of skin contact: In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes.
### Get medical attention.
- Wash clothing before reuse.
- Thoroughly clean shoes before reuse.

**In case of eye contact:**
- In case of contact, immediately flush eyes with plenty of water for at least 15 minutes.
- If easy to do, remove contact lens, if worn.
- Get medical attention.

**If swallowed:**
- If swallowed, DO NOT induce vomiting.
- Get medical attention.
- Rinse mouth thoroughly with water.

**Most important symptoms and effects, both acute and delayed:**
- May be harmful if swallowed.
- Causes skin and eye irritation.
- Suspected of damaging the unborn child.
- May cause damage to organs through prolonged or repeated exposure in contact with skin.

**Protection of first-aiders:**
- First Aid responders should pay attention to self-protection, and use the recommended personal protective equipment when the potential for exposure exists (see section 8).

**Notes to physician:**
- Treat symptomatically and supportively.

### SECTION 5. FIRE-FIGHTING MEASURES

| Suitable extinguishing media | Water spray  
| : | Alcohol-resistant foam  
| : | Carbon dioxide (CO2)  
| : | Dry chemical  |
| **Unsuitable extinguishing media** | None known.  |
| **Specific hazards during fire fighting** | Exposure to combustion products may be a hazard to health.  |
| **Hazardous combustion products** | Carbon oxides  
| : | Chlorine compounds  
| : | Nitrogen oxides (NOx)  |
| **Specific extinguishing methods** | Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.  
| : | Use water spray to cool unopened containers.  
| : | Remove undamaged containers from fire area if it is safe to do so.  
| : | Evacuate area.  |
| **Special protective equipment for fire-fighters** | In the event of fire, wear self-contained breathing apparatus.  
| : | Use personal protective equipment.  |

### SECTION 6. ACCIDENTAL RELEASE MEASURES

| Personal precautions, protective equipment and emergency procedures | Use personal protective equipment.  
| : | Follow safe handling advice (see section 7) and personal protective equipment recommendations (see section 8).  |
| **Environmental precautions** | Avoid release to the environment.  
| : | Prevent further leakage or spillage if safe to do so.  
| : | Prevent spreading over a wide area (e.g., by containment or oil barriers).  
| : | Retain and dispose of contaminated wash water.  
| : | Local authorities should be advised if significant spillages  |
Methods and materials for containment and cleaning up:
- Soak up with inert absorbent material.
  - For large spills, provide diking or other appropriate containment to keep material from spreading. If diked material can be pumped, store recovered material in appropriate container.
  - Clean up remaining materials from spill with suitable absorbent.
- Local or national regulations may apply to releases and disposal of this material, as well as those materials and items employed in the cleanup of releases. You will need to determine which regulations are applicable. Sections 13 and 15 of this SDS provide information regarding certain local or national requirements.

Engineering measures:
- Use appropriate engineering controls and manufacturing technologies to control airborne concentrations (e.g., dripless quick connections).
- All engineering controls should be implemented by facility design and operated in accordance with GMP principles to protect products, workers, and the environment.
Containment technologies suitable for controlling compounds are required to control at source and to prevent migration of the compound to uncontrolled areas (e.g., open-face containment devices). Minimize open handling.

### Personal protective equipment

**Respiratory protection**: If adequate local exhaust ventilation is not available or exposure assessment demonstrates exposures outside the recommended guidelines, use respiratory protection.

- **Filter type**: Particulates type

**Hand protection**: Chemical-resistant gloves

**Eye protection**: Wear safety glasses with side shields or goggles. If the work environment or activity involves dusty conditions, mists or aerosols, wear the appropriate goggles. Wear a faceshield or other full face protection if there is a potential for direct contact to the face with dusts, mists, or aerosols.

**Skin and body protection**: Work uniform or laboratory coat. Additional body garments should be used based upon the task being performed (e.g., sleevelets, apron, gauntlets, disposable suits) to avoid exposed skin surfaces. Use appropriate degowning techniques to remove potentially contaminated clothing.

**Hygiene measures**: If exposure to chemical is likely during typical use, provide eye flushing systems and safety showers close to the working place. When using do not eat, drink or smoke. Wash contaminated clothing before re-use. The effective operation of a facility should include review of engineering controls, proper personal protective equipment, appropriate degowning and decontamination procedures, industrial hygiene monitoring, medical surveillance and the use of administrative controls.
