SECTION 4: First aid measures

4.1 Description of first aid measures

General advice: In the case of accident or if you feel unwell, seek medical advice immediately. When symptoms persist or in all cases of doubt seek medical advice.

Protection of first-aiders: First Aid responders should pay attention to self-protection, and use the recommended personal protective equipment when the potential for exposure exists.

If inhaled: If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention.

In case of skin contact: In case of contact, immediately flush skin with soap and plenty of water. Remove contaminated clothing and shoes. Get medical attention. Wash clothing before reuse. Thoroughly clean shoes before reuse.

In case of eye contact: In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. If easy to do, remove contact lens, if worn. Get medical attention.

If swallowed: If swallowed, DO NOT induce vomiting. Get medical attention. Rinse mouth thoroughly with water.

4.2 Most important symptoms and effects, both acute and delayed

Risks: Causes serious eye irritation. May cause allergy or asthma symptoms or breathing difficulties if inhaled. Suspected of damaging the unborn child. May cause damage to organs through prolonged or repeated exposure.
Excessive exposure may aggravate preexisting asthma and other respiratory disorders (e.g. emphysema, bronchitis, reactive airways dysfunction syndrome). Contact with dust can cause mechanical irritation or drying of the skin.

4.3 Indication of any immediate medical attention and special treatment needed

Treatment: Treat symptomatically and supportively.

SECTION 5: Firefighting measures

5.1 Extinguishing media

Suitable extinguishing media: Water spray
- Alcohol-resistant foam
- Carbon dioxide (CO2)
- Dry chemical

Unsuitable extinguishing media: None known.

5.2 Special hazards arising from the substance or mixture

Specific hazards during firefighting: Avoid generating dust; fine dust dispersed in air in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard. Exposure to combustion products may be a hazard to health.

Hazardous combustion products: Carbon oxides
- Metal oxides

5.3 Advice for firefighters

Special protective equipment for firefighters: In the event of fire, wear self-contained breathing apparatus. Use personal protective equipment.

Specific extinguishing methods: Use extinguishing measures that are appropriate to local circumstances and the surrounding environment. Use water spray to cool unopened containers. Remove undamaged containers from fire area if it is safe to do so. Evacuate area.

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Personal precautions: Use personal protective equipment. Follow safe handling advice and personal protective equipment recommendations.
6.2 Environmental precautions
   Environmental precautions : Discharge into the environment must be avoided.
   Prevent further leakage or spillage if safe to do so.
   Retain and dispose of contaminated wash water.
   Local authorities should be advised if significant spillages
   cannot be contained.

6.3 Methods and material for containment and cleaning up
   Methods for cleaning up : Sweep up or vacuum up spillage and collect in suitable con-
   tainer for disposal.
   Avoid dispersal of dust in the air (i.e., clearing dust surfaces
   with compressed air).
   Dust deposits should not be allowed to accumulate on surfac-
   es, as these may form an explosive mixture if they are re-
   leased into the atmosphere in sufficient concentration.
   Local or national regulations may apply to releases and dis-
   posal of this material, as well as those materials and items
   employed in the cleanup of releases. You will need to deter-
   mine which regulations are applicable.
   Sections 13 and 15 of this SDS provide information regarding
   certain local or national requirements.

6.4 Reference to other sections
   See sections: 7, 8, 11, 12 and 13.

SECTION 7: Handling and storage

7.1 Precautions for safe handling
   Technical measures : Static electricity may accumulate and ignite suspended dust
   causing an explosion.
   Provide adequate precautions, such as electrical grounding
   and bonding, or inert atmospheres.
   Local/Total ventilation : Use only with adequate ventilation.
   Advice on safe handling : Do not breathe dust.
   Do not swallow.
   Do not get in eyes.
   Avoid prolonged or repeated contact with skin.
   Handle in accordance with good industrial hygiene and safety
   practice, based on the results of the workplace exposure as-
   sessment
   Keep container tightly closed.
   Already sensitised individuals should consult their physician
   regarding working with respiratory irritants or sensitisers.
   Minimize dust generation and accumulation.
   Keep container closed when not in use.
   Keep away from heat and sources of ignition.
   Take precautionary measures against static discharges.
   Take care to prevent spills, waste and minimize release to the
   environment.
   Hygiene measures : Ensure that eye flushing systems and safety showers are
located close to the working place. When using do not eat, drink or smoke. Wash contaminated clothing before re-use. The effective operation of a facility should include review of engineering controls, proper personal protective equipment, appropriate degowning and decontamination procedures, industrial hygiene monitoring, medical surveillance and the use of administrative controls.

### 7.2 Conditions for safe storage, including any incompatibilities
